- Engineering Services such as the planning, design, analysis, specification development and application, procurement adherence to the design and commissioning for the project, assuring that the project facility is safe, operable, maintainable, cost-effective, constructible, reliable and meets the design intent of the project.
- Marine Warranty Surveyor Services (rotational)
- Logistics and Materials Management, and Logistics

The primary purpose of the SLGC project is to provide a Lean Gas Platform (LGP) and subsea pipelines to deliver up to 480 MMscfd of gas, currently injected into the Sanha reservoir, to ALNG to offset the forecast gas supply shortfall starting in the 2022 to 2025 timeframe. All facilities necessary to perform this primary purpose are included in what is referred to as the Base Scope of the SLGC project.

The SLGC project also provides structural capacity to support future booster compression for Block 0/14 Developments.

If a company is qualified based on the described services and is interested in being considered for participation in that tender they can submit their information through our website [www.chevroninangola.com](http://www.chevroninangola.com), Suppliers page, BID Announcement; fill the Supplier information form and forward to [concurso@chevron.com](mailto:concurso@chevron.com) within the time stipulated in the internet.
